

easy print clipping

Use **expaper** to cut articles
from epaper PDFs

Export in original layout

Clip easily and directly
from the PDF

Save time

Search your epaper PDFs
in seconds

Be flexible

Define search profiles and
keep an eye on new topics

Digital research - article extraction - media
review:

expaper allows the integration of articles from
the epaper editions of newspapers into the
digital media review faster, easier and more
convenient than ever before. Search in the
PDF - find - cut the article immediately
and clip it electronically.

Simply use your subscriptions to download the
epaper PDFs. Screen them - even several at the
same time! – fast and uncomplicated by full-
text search for relevant names, terms, keywords
and topics. Define your own search profiles. The
full-page view keeps you on top of things. You
can skim through the pages and discover other
interesting topics and articles.
